Site Support Pack: Conditions of Use

In purchasing a Site Support Pack for the Imperium Latin course, you must agree to the following Conditions of Use, which model those of a Site Licence. It is important to protect the future development of these materials, to ensure that when updates and changes are made, they can be controlled and released to the people who need them. So this agreement is important to all concerned.

The over-riding condition is that you should protect the materials in your institution, for use only by teachers and students of the course. **You should not upload any of these materials into an area where they can downloaded by the outside world.**

Some of the components of the Site Support Pack are restricted in other ways, and a list follows of things you should be aware of in deploying these resources.

The Secure Area

The files in the Secure Area are not for students to see or keep, but rather for use in restricted ways. For this reason they are password-protected. If you have bought the Site Support Pack, please email me (julian@imperiumlatin.com) and I will send you the password. If you use the tests or unseens, it is recommended that the students shouldn't keep their copies after they have been marked. The graded attainment tests should also not be allowed out of the centre, please.

The Books

All four of the Imperium books are included as pdf files. These can be installed onto computers, notebooks or tablets. They can be printed and circulated. They should not be made available in an unmonitored way to students.

The Images

All of the images from the four Imperium books are included as JPEG files. These can be stored in a location where students can access them, and they can be used in electronic assignments or presentations. They are mostly saved at a resolution of 300 dpi and can be printed at reasonable quality, at A4 size.

The MP3 files

Each exercise from the first three Imperium books is included as here as an MP3 file. Like the Images, these can be stored in a location where students can access them, and they can serve for students to work quickly in preparing the exercises. They can be central in creating a *Blended Learning* environment and have been found especially useful for students working on the Martial poems in Book 3. Please note that these files can also be purchased separately by students from their area of the website.

Imperium Word Tools for Mac OSX, PC and Linux

These files can be installed on as many computers as you like within your institution. They are not to be given to students for installation on their computers at home, however. Please note that if you need versions for Android or iOS, you will have to buy these separately from Google Play or the App Store. Students should be encouraged to buy their own versions, for iPhones, iPads, or whatever systems they have available to them.

Imperium Overview.pdf and **Imperium Scheme of Work.pdf**

These documents are freely distributable and carry no restrictions. They may be found useful in planning.

Imperium Practice tests.pdf and **Imperium Rough work sheets.pdf**

These documents can also be found in the Student Area of the website. They are freely distributable and carry no restrictions.

Why Imperium.pdf

This document is freely distributable and carries no restrictions.
